Introduction

This document contains the set of templates to be used when submitting an "IPv4 First Allocation Request Form". Please submit the form in plain ASCII text via e-mail to <hostmaster@ripe.net>.

Supporting Notes, including an example for a completed "IPv4 First Allocation Request Form", can be found in the RIPE Document Store at:

http://www.ripe.net/ripe/docs/first-allocation-support.html

It should be noted that since August 2000 the minimum allocation size issued by RIPE NCC is /20 (4096 IPv4 addresses).

In order to receive an initial IPv4 allocation, an organisation needs to demonstrate either existing efficient utilisation of at least a /22 (1024 IPv4 Addresses) or an immediate need (i.e. usage within three months) of a /22.

Prior to requesting a first IPv4 allocation, complete one or more IPv4 address space request forms and submit them to <hostmaster@ripe.net>. All requests will be assigned a unique ticket reference number that you should supply in the "IPv4 Assignment Ticket Number" section.

Organisations using a /22 or fewer addresses are required to renumber those networks into the new allocation.

Warning:

Requests sent to the RIPE NCC that lack a proper Registry Identifier (**X-NCC-RegID**) will be returned to the sender. Please include the Registry Identifier in the header of the message or at the top of this form. Additionally, modifying the templates is likely to delay the request.
