Introduction

This document contains the set of templates to be used when submitting a request for an initial IPv6 allocation. Please submit the form below in plain ASCII text via e-mail to <hostmaster@ripe.net>.

A supporting notes document, which explains how to complete this form, is available from the RIPE Document Store at:

http://www.ripe.net/ripe/docs/ipv6-support-initial.html

Warning:

Requests sent to the RIPE NCC that lack a proper Registry Identifier (**X-NCC-RegID**) will be returned to the sender. Please include the Registry Identifier in the header of the message or at the top of this form. Further, any modifications to the templates may result in a delay in handling.

#[REGISTRY ID]#

X-NCC-RegID:

#[OVERVIEW OF ORGANISATION TEMPLATE]#

Q1: Please provide a short description of the organisation requesting the IPv6 address space.

Q2: Is this IPv6 request for the entire organisation or will other parts of the organisation also be requesting an allocation?

Q3: Will your organisation also be requesting (or do you already have) an IPv6 allocation from another Regional Internet Registry (RIR)?

Please note that a Local Internet Registry (LIR) can only request an allocation for itself and not on behalf of another organisation.

```

#[ADDITIONAL QUESTIONS]#

1. IPv6 address space is allocated to LIRs according to policies set by the RIPE community.

It should be noted that, as stated in the IPv6 policy document, IPv6 address space is not considered property. IPv6 address space is licensed for use rather than owned.

Please confirm that you have read the policy document "IPv6 Address Allocation and Assignment Policies" and agree to abide by it. The document can be found in the RIPE Document Store at:

http://www.ripe.net/ripe/docs/ipv6-policies.html

2. Please provide a network diagram in PostScript or JPEG format showing your IPv6 network. Submission instructions can be found in the RIPE document "Supporting Notes for the Initial IPv6 Allocation Request Form in the RIPE NCC Service Region" at:

http://www.ripe.net/ripe/docs/ipv6-support-initial.html

It should indicate expected dates for completion of construction as well as how much IPv6 address space is expected to be used in each segment.

3. If your organisation has a web site detailing your planned IPv6 services, please provide the URL below:
