30. Wifi on the floor I was on was barely usable. I eventually
went out and bought an ethernet interface, and the
ethernet was fine. The staff were almost always good, but
there was one guy down in the restaurant who enforced a
dress code on me—he made me go upstairs and change
from slippers into shoes on some flimsy excuse.
Fortunately this happened on a day when I didn't have a
9:00 meeting, or I would have missed breakfast. The staff
on other days did not hassle me about wearing slippers. I
was wearing slippers because my shoes got completely
soaked one night when it rained. The IESG breakfast on
Sunday was excellent; unfortunately it got worse on
Monday and worse still on Tuesday as fruits and yogurt
were removed. I suspect that this was the result of some
complaining by IAB members about lack of variety in other
areas; while I sympathize with this, we should be careful
of what we ask for—if we want more variety, we should
make sure that we don't get _different_ variety and wind
up robbing Peter to pay Paul.

16. Multiple email lists and aliases were used to get feedback and communicate to attendees. These include NOC@ietf.org to report network issues, Meeting Trouble Desk - mtd@ietf.org to report non-network meeting problems and provide feedback, 87All@ietf.org for one way admin info and the 87Attendees@ietf.org list to share info among attendees. How would you rate their usefulness?
