

Internet Assigned Numbers Authority (IANA) Plenary Report

IETF 118, Prague

Key Highlights and Milestones

- IANA met or exceeded all service level agreements for protocol parameter functions from July to October 2023.
- More than 700 IETF-related requests were processed since IETF 117. These include document reviews, registry creation, new registrations, modifications to existing registrations, and deletions.
- Created 30 new registries and four registry groups (reflected as new unique registry URLs) since IETF 117.
- Reviewed IANA Considerations for all documents on the IETF 118 WG agendas.

Overview of Activities

Performance in brief

Last 12 months (i.e. October 2022 – September 2023)

*Does not include Private Enterprise Number (PEN) Requests

More comprehensive monthly statistics reports can be found at <https://iana.org/performance>

Since IETF 117

Request Type	Total
Last Calls	33
IESG Evaluations	47
RFC Publication Approvals	43
Media Types	8
Ports and Port Modifications	17
New Private Enterprise Numbers	433

Customer satisfaction in brief

At the conclusion of request processing, IANA sends a short survey to customers to ask them whether they were satisfied with our performance. These are only issued for requests directly sent to IANA (i.e. not through the RFC editorial process), and no more than one survey is sent per customer every 60 days even if they conduct multiple transactions.

	August	September
Response Rate	36.4%	44.4%
Satisfaction	100%	75%

Updates and initiatives

- The registry workflow system, which has been successfully supporting Private Enterprise Number (PEN) request submissions since November 2022, is preparing for the next phase in IETF registry automation. We will have more details to share at IETF 119.
- A project to review “designated experts” for registries has been completed. The purpose of this project was to ensure that our list of experts and contact information is correct and that those experts wished to continue to serve. We have contacted individual experts and teams of experts, with a comprehensive inventory taken. We will continue to work with the IETF area directors to review adjustments that need to be made.

Additional information

- IANA will maintain “office hours” during IETF 118. Look out for our booth, and bring any questions you may have about your Internet Drafts, how registries operate, or anything else IANA-related.
 - Our booth will be manned Monday through Thursday, from 9am to 5pm
 - If we’ve stepped away, or you’re attending remotely, you can always drop us a note to iana@iana.org and we will follow up with you
- We always encourage authors to speak with us about their prospective IANA registrations early in the document development process. Send questions and requests for early document reviews to iana@iana.org
- Our index of protocol parameter registries can be found at <http://www.iana.org/protocols>
