RFCs published from 2009 to 2019

Since IETF 103

- Published 53 RFCs (1756 pages; 3 Nov – 14 Mar).

- Continued to use id2xml to create an XML file when no usable source file was provided.

- Hired and trained transitional editor.

- Made errata records available publicly in JSON format.

- Continued to work with Martin Bjorklund to format YANG modules.

- Cleaned up data for "never issued" RFC numbers for consistent handling.

- Completed review of source data for RFCs published in 2003 and 2004.

- Updated website text to account for IASA2 changes.

Format-Related Activities

- Had training sessions with tool developers

- Tested and installed [Callas](#) software and license for the creation of PDF/A-3

- Ongoing:
  - Testing v3 tools and reporting bugs
  - Drafting internal procedures
  - Learning v3 vocabulary
  - Developing and testing updates to publication, archiving, and errata-related software.
  - Updating user documentation (e.g., xml2rfc FAQ)

Ongoing Activities

- Continue to edit and publish documents

- Continue with v3-related work

- Work with RSE on rfc7322bis (RFC Style Guide)
  Will evolve as v3 features are used
