The Role of WGs in Final Process Stages

A lot of effort in the final parts of the process, when the IESG's role is central

We are starting an experiment that puts the working groups better in charge:

- Documents with many issues will be handed back to working groups

- Document Shepherds invited to IESG telechats when significant discussion is expected

- Making it possible for directorate reviews (SecDIR etc) to happen before IETF Last Call

Appeals

Three appeals received and answered:

- JFC Morfin on additional material for RFC 6852 (later re-appealed to IAB)

- Douglas Otis on rationale for RFC 6376 advancement

- Abdussalam Baruyn on draft-ietf-manet-nhdp-sec-threats acknowledgments

Mentoring Program

More than 50 participants matched with mentors

- o Limited to in-person participants this time
- o Will be distributing surveys to collect feedback

http://www.ietf.org/resources/mentoring-program.html

Thanks to the mentors, coordinators,
and organisers:

- o Ralph Droms
- o Lars Eggert
- o Leif Johansson
- o Robert Sparks

- o Ron Bonica
- o Alissa Cooper
- o Brian Haberman
- o Alexa Morris

Diversity

- Another talk in the agenda to go into more depth
- But it would be useful to talk about motivation – why do we need to become more inclusive?
- What current actions have we taken?

Motivation for Becoming More Inclusive

- There is room to improve…
  - ○ Vendor/operator, geography, gender, or cultural differences
  - ○ IETF is often seen as a "harsh" discussion forum
- Diverse teams generally perform better
- Understand everyone's networking needs and be seeing as doing that

We have to <u>compete</u> for talent, be <u>smart,</u> and be <u>global,</u> inclusive

The First Actions

This will be a continuous process, but we have taken some early steps:

- ISOC policy/fellows programs
- Meetings outside our traditional areas
- Local events and outreach
- Diversity design team
- Mentoring program
- Emphasis for diverse backgrounds in job descriptions
- …

Running Code This Week
